The Synology Difference

Cloud Services

Anyone, even businesses, can setup their own private cloud on DiskStation effortlessly by using Synology's Cloud Services and enjoy the benefits of automatic file sync between computers, one-click internet setup and a cost free DDNS service.

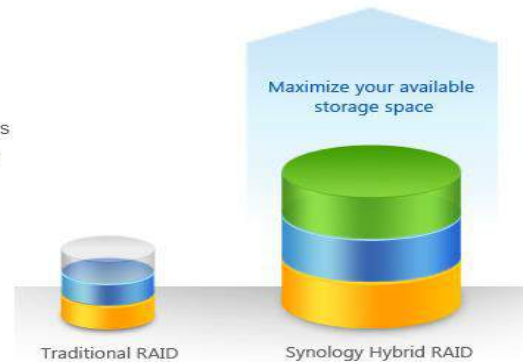

Apps On-Demand

In Synology, we believe in the potential of NAS servers, that it should be flexible and multi-functional. Therefore we have developed a suite of apps for users to install them freely and instantly. A simple click and you are done.

Synology Hybrid RAID

Synology Hybrid RAID (SHR) is an optimized volume type. There's no need to study the difference between RAID types and requirements – SHR helps you keep everything simple and instant.

Become one with your phone

Nowadays, people spend nearly every waking hour with their smartphone. Our mobile phones connect us to others, so we have become connected to our phones. We designed iRing to accommodate this personal relationship.

iRing's ergonomic grip design makes you feel like your smartphone is an extension of your body. It provides you with a sense of security when you're actively engaging with your phone. In fact, you may never drop your phone again.

Make a stand, anywhere

0°~180°

When you're not holding your smartphone, it's probably still within your reach: on your desk, next to your monitor, or on your bedside table when you sleep. In any case, you want your screen to be visible and easily accessible.

iRing is your portable, kickstand solution. We designed a robust friction hinge to support your phone in both landscape and portrait views. And unlike our competitors, iRing won't buckle under the weight of your device. From your hand to your table, iRing stands for you.

Compact industrial design

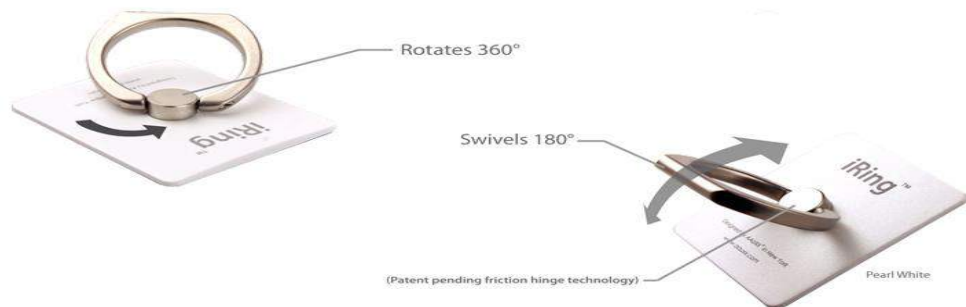

With a thickness of only 6.2 mm and weight of 9.8g(0.34oz), iRing's sleek design seamlessly compliments your phone's profile and slips effortlessly into your pocket.

Proprietary adhesive technology

iRing can be removed at any time without leaving any residue. Powered by STIXX[®], iRing's pressure sensitive adhesive can be washed in water when dirty and reapplied again and again.

Rinse / Let dry / Reapply

Design Integrity

We know how important your smartphone is to you so we built a product that will endure the everyday handling of your current phone, and even its successor.

Your iRing rotates 360° and swivels 180° to accommodate your unique grip and optimal viewing angle. Unlike similar products, iRing's superior functionality won't diminish after repeated usage. We use quality materials and high-precision CNC machining with a tolerance of 0.01mm. iRing is built to last.
